

# AC - Low Voltage Digital Dimmer

## Features:

- Lower installed cost than dimmable transformers
- Dims most bulbs including dimmable LEDs
- Perfect for indoor and outdoor applications
- Overload indicator (bulbs blink to indicate overload)
- Short-circuit protection with simple recovery
- Transient protection (supply side and load side)
- Extremely smooth trailing edge dimming
- IP67 (dustproof, water resistant, potted electronics)
- Intelligent soft-start

AC-LVDD-10

## Technical Specs:

- Current capacity: 10A
- 12VAC - 24VAC operation
- Max load = 120W at 12V / 240W at 24V
- No minimum load required
- Auto frequency adjust (40Hz - 400Hz)
